

Product Change Notification

Change Notification #: PCN0607-04.0
Change Title: Optical Networking Products, Ethernet Transceiver – PLCC Conversion of MSL1 to MSL3, PCN0607-04.0, Transport Media
Date of Publication: 25 July 2007

Key Characteristics of the Change:

Transport Media

Forecasted Key Milestones:

Date Customer Must be Ready to Receive Post-Conversion Material:	24 August 2007
---	----------------

Description of Change to the Customer:

On October 15th, 2006, Cortina acquired a number of new products that had been processed by the previous supplier as Moisture Sensitivity Level 1 (MSL1), and Cortina has continued to ship products packed accordingly. At this time, Cortina is electing to change our processing for all the affected Material Master Numbers (MM#) to MSL3. Cortina will be phasing in this change over the next four weeks, and expect to ship 100% of the affected SKU's as MSL3 by 24 August 2007.

Customer Impact of Change and Recommended Action:

Cortina does not expect this change to affect our customers other than how they deal with residual units on their production line (returning of units to Moisture Barrier bags)

This change has no impact on form, fit, functionality, manufacturability, or product quality. Cortina does not anticipate impact to any customer applications. Until inventory is depleted, customers may receive MSL1 or MSL3 packaging as noted in the above milestones.

Please contact your local Cortina Systems Sales Representative for any further information regarding this product.
